# **Seminar template document**

**Max P. Researcher**

**Max Planck Institute for Informatics**

**04/12/2007**

# Dummy

Just a small dummy text. You can force a new slide by using the command `\newslide`.

However, in this template I redefined `\section` so they automatically start a new slide – this is good practise.

# A second demo slide

Place here the text of your second slide.
